Data Science Internship

Description:

Discover how you can apply your talent and skills to harness powerful change with our career-building paid internship in **Accenture Applied Intelligence** practice!

Are you ready to be a part of the digital reinvention of industry and revolutionize your career? Apply now to join our Applied Intelligence team at Accenture Greece as an intern.

As part of our AAI team, you will learn to manage, architect and analyse big data in order to build data driven business insights and high impact data models to generate significant business value. Applied Intelligence covers a range of industries creates models and processes to collect, distil and interpret data with a view to aid better, more informed decision making. Examines and explores data from multiple disparate sources with the goal of discovering insights which in turn can provide competitive advantage for our clients.

You will bring your big ideas, insatiable curiosity for technology and a passion for entrepreneurial disruption and go as far as your ambition takes you.

Required background and skills:

• Being enrolled in a MSc in Computer Science, Statistics, Mathematics, Operational Research, Econometrics or related science field from a well-established University
• Advanced level in using programming tools and platforms to manipulate datasets and perform data analysis
• Familiarity with Data Science scripting (in R / Python / Scala) and cloud technologies
• Ability to think strategically; turn consumer behaviour data into effective strategies and drive results
• Exceptional analytic and critical thinking skills, writing skills, communication skills, consulting skills, and ability to work within a team
• Ability to work in an environment with hard deadlines, quick turnaround, and changing priorities
• Fluency in English is required due to participation in multinational project teams

Other important information that applicants must know:

Accenture Greece internship programs is one of the most competitive programs in the market! You will have the chance to join a strategy firm that provides unprecedented breadth and depth of experience. You'll collaborate with experts across our unique end-to-end business model to define innovative strategies that drive growth and create impact for clients and the world around us!
